Profile Summary

- Full Stack Developer with 3+ years of experience building secure, scalable, and performant web applications using React, Node.js, Next.js, and AWS. Specialized in integrating LLMs, deploying cloud-first architectures, and delivering intelligent solutions for the fintech domain.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML/CSS

Frameworks/Libraries: Node.js, React, Next.js, Express.js, Redux, Recoil, Material UI, Tailwind CSS, ShadCN, MERN Stack

Cloud DevOps: AWS (EC2, S3, Lambda, API Gateway, SQS, RDS, ECS, CDK, Cognito, CloudWatch, Textract), Docker

Databases and AI/ML: MongoDB, MySQL, Postgres, DynamoDB, LLMs (AWS Bedrock - Claude 3 Haiku, Llama 3.2 Vision)

Core Skills: Data Structures and Algorithms, Problem Solving, Agile Methodologies, System Design

Experience

SMC Global Securities — Fintech

July 2024 – Present

Member of Technical Staff | Full Stack Developer

Delhi, India

- Developed a full-stack serverless chat sentiment analysis platform using **AWS Bedrock (Claude 3 Haiku LLM)** to extract sentiment, entity, and satisfaction scores from conversations, improving customer insights by 40%.
- Revamped a Windows Forms-based **Pre-Order Service RegTech App** to a **Next.js** web application, transitioning from Oracle SQL to **Microsoft SQL Server** while integrating **AWS S3, SQS, and RDS** for voice recording processing.
- Engineered a cross-functional **URL Shortener** with admin dashboard using **AWS CDK, Lambda, API Gateway, and Cognito**, featuring OAuth 2.0 authentication, rate limiting, and custom domains.
- Developed an AI-powered **Signature Verification System** with **Next.js, AWS Textract, DynamoDB, and Llama 3.2 Vision** model, achieving 86% verification accuracy for regulatory compliance.

Infosys Limited

June 2022 – July 2024

Digital Specialist Engineer | Full Stack Developer

Chandigarh, Haryana

- Collaborated to a scalable railcar and container tracking app for **Wabtec Corporation**, enhancing shipment visibility and improving inventory control efficiency.
- Designed and developed **RESTful APIs** using **Node.js** and **Express.js** to support real-time container tracking, processing over 10,000 daily tracking requests with 99.9% uptime.
- Implemented **Cerbos** for decentralized **RBAC** and **ABAC** authorization within a **microservices architecture**, enabling secure, policy-driven access control and reducing security incidents by 75%.
- Improved frontend performance by 40% and enhanced UX with **React.js, React Router, Axios, and Material UI**, Recoil, resulting in 30% faster page load times and less rendering.

Projects

Pre-Order Service Project Revamp | Next.js, TypeScript, Microsoft SQL Server, AWS, Node.js

- Revamped a legacy Windows Forms application into a scalable Next.js web-based trade order system, migrating the backend from Oracle to Microsoft SQL Server for optimized performance and maintainability.
- Integrated a voice recording processing module using **AWS CDK, S3, SQS, ECS, and RDS PostgreSQL**.
- Developed a containerized Node.js service to extract structured metadata from voice recordings, implementing a resilient architecture with dead-letter queues, auto-scaling, and secure IAM-based access control.

Chat Sentiment Analysis App | AWS Bedrock (Claude 3 Haiku), Lambda, DynamoDB, Next.js

- Developed a full Stack serverless chat sentiment analysis platform leveraging **AWS Bedrock (Claude 3 Haiku)** for sentiment, entity, and Satisfaction score extraction from conversations inspired from **AWS Comprehend Service**.
- Developed a Next.js dashboard for real-time sentiment, entity, key phrases and language analytics visualization.

Signature Verification System | Next.js, AWS Textract, DynamoDB, LLMs

- Built an AI-powered signature verification system using **AWS Textract, Next.js, and DynamoDB, Llama 3.2 Vision** model
- Integrated a Meta Llama 3.2 Vision Model on **AWS bedrock** for accurate signature matching.

AWS Serverless URL Shortener | AWS Lambda, API Gateway, Python, TypeScript, CDK

- Developed a multi-team, scalable URL shortening service using **AWS Lambda, API Gateway, CloudFront, and Cognito**.
- Implemented API key-based access, **OAuth 2.0** authentication, rate limiting, and custom domain support.

Education Achievements

Rajkiya Engineering College, Azamgarh

Aug. 2018 – May 2022

Bachelor of Technology in Information Technology

Uttar Pradesh

- * Solved 350+ Data Structures Algorithms problems on platforms including **LeetCode, CodeChef, GFG, and HackerRank**.
- * 3 Star Competitive coder at **CodeChef** with highest rating of 1551.
